Objective

Data and AI professional with 5+ years of experience, combining a strong analytics foundation with hands-on AI engineering skills including ML pipelines, RAG systems, ETL workflows, and model productionization to drive marketing intelligence and business decisions.

Experience:

Clarix, an Apple Company - AI Engineer

(Nov 2024 – Present)

- Designed and deployed a RAG pipeline using LangChain and FAISS to enable semantic search over 100,000+ marketing contact records, allowing the marketing team to query campaign insights in natural language.
- Built and maintained production-grade ETL pipelines in Python orchestrated via Apache Airflow, ingesting and transforming marketing data from Salesforce, ZoomInfo, LinkedIn Ads, Adobe Analytics into a centralized data warehouse replacing fragmented manual spreadsheet workflows.
- Developed and productionized a lead scoring ML model using XGBoost trained on historical Salesforce CRM data, predicting conversion likelihood across 100,000+ contacts and improving outbound campaign targeting efficiency by ~35%.
- Architected a real-time Python automation pipeline integrating LinkedIn's Conversion API with Salesforce using ML-based logic to extract and sync li_fat_id tracking data, eliminating manual attribution workflows and improving paid campaign measurement accuracy.
- Built and deployed FastAPI microservices to serve ML model predictions to downstream marketing tools, enabling real-time lead scoring at the point of Salesforce record creation, containerized using Docker and deployed via GitHub Actions CI/CD.
- Designed ELT workflows using dbt and built 6+ executive-facing Tableau and Power BI dashboards tracking campaign ROI, lead funnel metrics, channel attribution, and AI model performance KPIs which is consumed weekly by marketing leadership.

Collabera Technologies Pvt Ltd / Qualcomm India Private Limited

Senior Business Process Analyst

(Jul 2022 - Oct 2024)

- Created Tableau and Power BI reports and dashboards for Business Development Teams. Managed forecast pipeline in Salesforce and Tableau.
- Managed revenue pipeline opportunities across all business verticals and updates in the Salesforce QSales system in coordination with the business development team.
- Coordinated with all stakeholders to support Distributor business - manage the opportunity pipeline, pricing quotes and approvals, etc.
- Identified and drove process improvement initiatives across the distributor business by analysing opportunity pipeline data, defining metrics, and documenting functional specifications to improve forecast accuracy and operational scalability.
- Led cross-functional stakeholder engagement across business development, supply, and pricing teams to streamline opportunity pipeline management, pricing approvals, and reporting workflows in Salesforce QSales and Tableau.

Procter and Gamble - Supply Chain Analyst (E-Commerce)

(Nov 2021 - Jul 2022)

- Managed quick commerce PO processing and fulfillment for clients like Blinkit, Swiggy Instamart, Dunzo, Zepto.
- Collaborated with internal teams (distribution, planning) to optimize stock levels and address order fulfillment issues.
- Generated reports using Tableau and Power BI for supply chain analysis (inventory, fill rates, forecasts) and buying decisions.
- Conducted weekly RCAs to identify root causes of order cuts and implemented corrective actions.
- Analysed customer data to identify in-stock opportunities and improve service levels.

Nivea India Pvt Ltd – Supply Chain Customer Analyst

(Dec 2020 - Apr 2021)

- Managed PO processing for quick commerce clients ensuring accuracy and timely fulfillment (TAT).
- Optimized stock levels, addressed order fulfillment issues and maintained high fill rates through collaboration with distribution and planning teams.
- Maintained master data accuracy and generated reports for supply chain analysis and buying decisions.
- Conducted weekly RCAs to identify root causes of order cuts and implemented corrective actions.

Morchem India Pvt Ltd - Logistics and Customer Service Administration

(Jul 2020 - Dec 2020)

- Utilized Tally ERP for sales invoice creation, data maintenance, and inventory control across production facilities and warehouses.
- Facilitated smooth movement of finished goods and raw materials by collaborating with production, transportation, and accounts teams.
- Managed import and export operations, ensuring timely deliveries and adherence to regulations.

Lakme Lever Pvt Ltd - Supply Chain Executive

(Nov 2019 - Jun 2020)

- Managed customer service inquiries related to the supply chain using SAP.
- Created purchase orders, performed goods receipts, and maintained accurate warehouse data.
- Handled domestic dispatches ensuring on-time deliveries through collaboration with transporters.
- Generated reports for internal stakeholders for consignment tracking and inventory management.

Skills:

- **Languages:** Python, SQL, Javascript
- **Analytics:** Tableau, Power BI, Adobe Analytics, Google Analytics (GA4)
- **Data & CRM:** Salesforce, ZoomInfo, Excel (Advanced), Google Sheets
- **Tools:** Git, GitHub Actions, Docker, REST APIs, LinkedIn Conversions API, Apache Airflow, dbt, FastAPI, MLflow
- **ML:** TensorFlow, PyTorch, Pandas, XGBoost, Scikit-learn, LangChain, FAISS
- **Competencies :** API Integrations, Workflow Automation, Data Visualization

Education:

Vartak College - B.Sc. in Computer Science

(Jun 2013 - May 2016)

Major – Computer Science | University: Mumbai University

Institute of Logistics and Aviation Management - MBA

(Jun 2018 - May 2020)

Major – Supply Chain Management | University – Singhania University
